CAPABILITIES

- RF hardware & RFID systems
- Antenna / microwave design
- Reconfigurable antennas
- Beamforming, filters, diplexers
- Wireless power & energy harvesting
- PCB design & prototyping
- Embedded systems & FPGA

SOFTWARE

- CST Studio Suite
- Ansys HFSS
- Keysight ADS
- MATLAB
- Python
- C/C++
- Altium Designer
- OrCAD / Proteus

LAB

- VNA (Anritsu)
- Spectrum Analyzer (Tektronix RSA306)
- Oscilloscope
- Multimeter
- DC power supplies

LANGUAGES

- Arabic / Tamazight — Native
- French — Fluent
- English — Intermediate

Hafid TIZYI

RF & Microwave Engineer | RFID & Antenna Design

Ph.D.-qualified RF & Microwave Engineer with 10+ years of experience in RFID, antenna design, microwave circuits, electromagnetic simulation, RF validation, PCB development, and engineering education. Experienced with CST Studio Suite, Ansys HFSS, Keysight ADS, and hands-on laboratory instrumentation.

PROFESSIONAL EXPERIENCE

Consultant & Project Manager | X-Secure Payment Service (XSPS)

Rabat, Morocco • Apr 2022 – Nov 2024

- Designed an integrated surveillance infrastructure combining sensors, thermal cameras, radars, and drones for border-security operations.
- Implemented a secure communication network for reliable field-data transmission to a centralized command-and-control center.
- Designed and managed a real-time RFID asset tracking and localization system.

Robotics Trainer | RoboMakers Academy

Rabat, Morocco • Jun 2021 – Present

- Led practical robotics and embedded systems projects using LEGO Mindstorms EV3, VEX, Arduino, and Python.
- Developed IoT prototypes including Smart Home, Smart Parking, and Smart Irrigation systems.
- Created project-based learning content covering electronics, prototyping, and 3D design.

Part-Time Lecturer | National Institute of Posts and Telecommunications (INPT)

Rabat, Morocco • 2013 – 2025

- Taught RF communication systems, microwave engineering, antennas, analog/digital electronics, FPGA design, and embedded systems.
- Supervised student projects in RFID, PCB design, Arduino-based systems, and robotics.

Electronic Engineer | ELFA Electronique

Rabat, Morocco • 2011 – 2012

- Designed, tested and verified electronic platforms for industrial applications and maintenance workflows.

Hardware/Embedded Systems Intern | IObundle, Lda.

Portugal • Apr 2021 – Jul 2021

- Developed timer peripherals for an FPGA-based SoC and contributed to hardware/software acceleration of KNN.

EDUCATION

Ph.D. in Electronics and Telecommunications | National Institute of Posts and Telecommunications (INPT)

Rabat, Morocco • Mar 2019

- Dissertation: Design, Simulation and Implementation of a Reconfigurable Antenna System for RFID Applications.

M.Sc. in Electronics and Telecommunications | Abdelmalek Essaâdi University, Faculty of Sciences

Tetouan, Morocco • Jul 2011

B.Sc. in CEEA | University Moulay Ismail, Faculty of Sciences and Technologies

Er-Rachidia, Morocco • Mar 2009

RESEARCH & PUBLICATIONS

- Thesis co-supervisor, University Moulay Ismail (2019–2024): reconfigurable antenna system for RF energy harvesting applied to UAV platforms.
- M.Sc. internship project (2011): design, simulation, and implementation of a DVB-H antenna.
- Author of 27+ peer-reviewed journal and conference publications in RFID, antenna design, microwave engineering, beamforming, wireless power transfer, and RF energy harvesting.

INDUSTRIAL HIGHLIGHTS

- 10+ years in RF engineering and applied electronics.
- Strong simulation expertise with CST, HFSS, and ADS.
- Hands-on RF laboratory validation and hardware prototyping.
- PCB design and embedded development across academic and industrial contexts.
